

Fintech AI Hackathon — Ideas & Opportunity Map

Why build now — the European opening

\$115T

Global equity market cap — one of the deepest, most liquid markets on Earth.

150M+

Retail investor accounts worldwide — the fastest-growing user class in finance.

€35T

European household savings sitting in near-zero-yield accounts.

20%+

Retail share of US stock volume today, up from ~10% pre-2020.

Europeans hold trillions of euros in low-yield deposits. US equities dominate neo-broker flows in the EU — and Alpaca gives any builder instant access to that inventory without building clearing, KYC or market-data plumbing. Gen Z cites complexity and fees as the #1 blockers, so anything that kills a step wins.

Here are some ideas you can get inspired by

B2C neo-broker & investing apps *Broker API*

- ▶ "DCA-by-default" app — only button is invest €10/week. No charts.
- ▶ Joint portfolio for couples / families with shared goals + streaks.
- ▶ Thematic ETF builder: user picks causes (climate, AI, EU champions) → real basket.
- ▶ SEPA round-ups auto-invested into fractional US stocks.
- ▶ Gen-Z onboarding in <60s — KYC, funding, first trade, one screen.

Algo, AI & copy-trading *Trading API + Market Data*

- ▶ Natural-language trader: "buy €200 of every company Macron mentioned this quarter".
- ▶ 13F-mirror bot: auto-replicate specific fund filings on a click.
- ▶ News-event scalper streaming ECB / Fed / EU-reg feeds over WebSocket.
- ▶ LLM portfolio coach that argues against your next trade before placing it.
- ▶ Climate-risk auto-rebalancer when physical-risk signals spike.

Embedded & B2B *Broker API + OAuth*

- ▶ Invest-a-slice-of-payroll plugin for EU HR platforms (Payfit, Personio).
- ▶ "Buy the stock" button in newsletters, media, or gig-worker apps.
- ▶ White-label US market access for EU neobanks that lack it.
- ▶ Loyalty cash-back auto-invested in the brand's own stock.
- ▶ Insurance premium overflow auto-invested after claim payouts.

Data, research & analytics *Market Data API*

- ▶ Sentiment dashboard: EU Twitter / Reddit cross-referenced with price moves.
- ▶ Portfolio health score — diversification, FX risk, ESG, concentration.
- ▶ Cross-border tax optimizer for EU residents holding US stocks.
- ▶ Insider-flow visualizer for European small caps.
- ▶ Earnings-season war room: live quotes + consensus deltas.

During the Hackathon you are free to follow your ideas
